Gentlemen: In re Claim No. 45489

It is impossible to give exact figures on coin purporting to be made at Tarsos about 450 B. C. There are several varieties and two sizes and the condition of the coin is also a factor in the price. Consulting recent quotations on coins of this period it is probably a coin about 7/8 inches in diameter, and without knowing further details would say that it is worth about $10.00.

Very truly yours,

HW:JG
